

CHAPTER BY CHAPTER SAMPLING OF CONTENT

Ch 1 What Is Vocology and How Did It Arise?

The Clientele of Vocologists
Vocal Problems as a Public Health Concern
Regimens for Voice Habilitation

Ch 2 Voice Pathology

Guidelines from the World Health Org
Incidence and Prevalence of Voice Disorders
The Biology of Vocal Fold Tissue
Lamina Propria
Classifying Voice Pathologies
Genetic Voice Pathologies
Congenital Pathologies Affecting Voice
Pathologies Related to Mechanical Stress
Pathologies Related to Tissue Viscoelasticity
Pathologies Related to Fluid Transport
Pathologies Related to Airway Environment
Pathologies Related to Abnormal Muscle Activation

Ch 3 Pharmacological Effects on Voice

Medications
Anti-Bacterial Infections
Viral Infections
Allergies
Edema
Inflammation
Pain
Asthma
Cough
Gastric and Laryngopharyngeal Reflux
Stage Fright
Spasmodic Dysphonia
Appetite Suppression
Mood Conditions
Motion Sickness
Pruritis (Itching)
Diarrhea
Acne
Sleep Disturbance
Hormone Imbalances
Hypertension

Ch 4 VOCOMETRY: Assessing General Vocal Ability

Tools of Measurement
Purpose of Measurement
Measurement Scales
General Assessment Principles
Evaluation Procedures

Ch 5 VOCOMETRY: Instrumentation

Overview of Instrumentation
Vibration
Basic Instruments Clinics Can Afford

Ch 6 Physical Fitness and Exercise Principles

Basic Muscle Anatomy and Physiology
Muscle Fiber Types in the Larynx
Muscle Receptors
Exercise Principles
Basic Spine Flexure Exercises
Formalized Body Alignment & Awareness
Manual Circumalaryngeal Massage
Laryngeal Rest Versus Exercise: Effects on Wound Healing
General Wound Healing Processes

Ch 7 Perceptual-Motor Learning Principles

Motor Learning Defined
Historical Context
Early Models of Motor Learning
Schema Theory
Cognitive Processes in Motor Learning
Awareness & Attention in Motor Learning
Structuring Practice: How to Train

Ch 8 Compliance and Concordance

Terminology
Measuring Compliance
Severity of Health Condition
Patient Variables
Treatment Variables
Treatment Effects
Quality of Clinician-Patient Interaction
Summary of Compliance Factors

Ch 9 The Union of Breathing, Valving and Voicing

An Interactive Sound Generating System
Exploring Your Lungs and Airways
The Breathing Oscillator & Valving Oscillator
Combining the Breathing and Valving Oscillators With Voicing

Ch 10 Using the Vocal Tract to Enhance the Sound Source

Clinical Definition of Resonant Voice
Acoustic Impedance
Reactance, Inertance, and Compliance
Acoustic Impedance of the Vocal Tract
The Effect of Vocal Tract Reactance on Self-Sustained Vocal Fold Oscillation
Idealized Vocal Tract Shapes
Humming as a Resonant Voice Exercise

Ch 11 Modulating Phonation with Prosody

Intonation and Melody
Modulations of Fundamental Frequency
Prescribed Melody in Singing
Amplitude Modulation Measured as Sound Level
The Voice Range Profile Embedded in the Hearing Range Profile

Ch 12 Modulating Phonation With Articulation

The Neutral Vowel
Speaking Vowels Versus Singing Vowels
Modulating Phonation
 w/ Voiced Consonants
Modulating Phonation
 w/ Articulatory Trills
Modulating Phonation
 w/ Unvoiced Consonants
Modulation w/ Consonant Clusters & Tongue Twisters
